

# **SIMATS ENGINEERING**

## **ASSESSMENT TOOL 3**

**COURSE NAME: INTERNET PROGRAMMING**  
**COURSE CODE: CSA43**

### **COURSE OUTCOME COVERED**

**CO-1:** Develop well-structured, standards-compliant web pages using HTML/XHTML and XML, and apply Internet protocols and HTTP communication mechanisms for web content delivery. **(L2)**

Assessment Tool: Code along exercise: Make your first HTML page together with CSS

**Weightage: 10%**

**QUESTIONS: Total Marks: 10**

### **Scenario: Web Development Standards Implementation**

A start up is developing a modern web application. During development, the team encounters multiple issues related to HTML elements, HTTP methods, XML syntax, and web communication protocols.

The following observations are made:

- The team needs to embed a promotional video on the homepage.
- A registration form must securely send user data to the server.
- The navigation menu must follow semantic HTML standards.
- XML configuration files are being used but contain syntax errors.
- The application must communicate over the correct web protocol.

### **Data Snippets Provided**

#### **Snippet 1: Video Embedding Options**

A. `<media src="video.mp4"></media>`

- B. <video src="video.mp4" controls></video>
- C. <movie src="video.mp4"></movie>
- D. <vid src="video.mp4"></vid>

### Snippet 2: Form Submission Methods

- A. GET
- B. POST
- C. PUT
- D. DELETE

### Snippet 3: Navigation Elements

- A. <div>
- B. <nav>
- C. <section>
- D. <header>

### Snippet 4: XML Syntax

- A. <note><to>User</to><from>Admin</from>
- B. <note><to>User</to><from>Admin</from></note>
- C. <note><to>User</from></note>
- D. <note to="User"></note>

### Snippet 5: Web Communication Protocols

- A. FTP
- B. HTTP
- C. SMTP
- D. SNMP

### Questions:

1. Select the **correct HTML tag for video embedding** and justify your answer.
2. Identify the **appropriate HTTP method for form submission** and explain why.
3. Choose the **proper semantic element for navigation** and justify its usage.
4. Identify the **correct XML syntax** and explain the error in other options.
5. Choose the **correct protocol for web communication** and justify your choice.

### Code of Conduct:

*I G.Mohammad shareef(192311288) (Name / Reg No) certify that this submission is my original work and that I have adhered to the guidelines specified for this assessment. I understand that any violation of academic integrity rules will result in disciplinary action.*

***Signature of the student: G. Mohammad shareef***

**RUBRICS FOR CALCULATION:**

| <b>Criteria</b>         | <b>Weightage</b> | <b>Level 4 – Exemplary</b>                                       | <b>Level 3 – Proficient</b>                    | <b>Level 2 – Developing</b>              | <b>Level 1 – Beginning</b>                           |
|-------------------------|------------------|------------------------------------------------------------------|------------------------------------------------|------------------------------------------|------------------------------------------------------|
| Understanding of Case   | 25               | Thorough understanding; clearly identifies all key issues        | Good understanding with most issues identified | Basic understanding ; some issues missed | Poor understanding; problem not identified correctly |
| Application of Concepts | 25               | Effectively applies relevant concepts to analyze the case deeply | Applies appropriate concepts with minor gaps   | Limited application of concepts          | Fails to apply relevant concepts                     |
| Analysis                | 20               | In-depth analysis with strong reasoning and insights             | Good analysis with logical reasoning           | Basic analysis with limited depth        | Weak or no analysis; lacks reasoning                 |
| Solution Design         | 20               | Innovative, feasible solutions with strong justification         | Logical solutions with adequate justification  | Basic solutions with weak justification  | Incorrect or no solution provided                    |
| Clarity                 | 10               | Clear, well structured, and easy to understand                   | Organized and understandable presentation      | Limited clarity and structure            | Poor clarity; difficult to understand                |

**1. Select the correct HTML tag for video embedding and justify your answer.**

**Answer: B. `<video src="video.mp4" controls></video>`**

**Justification:**

The `<video>` element is the standard HTML5 tag used to embed videos. The `controls` attribute provides play, pause, volume, and fullscreen controls for users.

---

**2. Identify the appropriate HTTP method for form submission and explain why.**

**Answer: B. POST**

**Justification:**

The **POST** method is used to securely send user data (such as registration details) to the server. Unlike GET, POST does not expose form data in the URL.

---

**3. Choose the proper semantic element for navigation and justify its usage.**

**Answer: B. `<nav>`**

**Justification:**

The `<nav>` element is the semantic HTML5 tag used to define navigation links or menus. It improves accessibility and search engine optimization (SEO).

---

**4. Identify the correct XML syntax and explain the error in other options.**

**Answer: B. `<note><to>User</to><from>Admin</from></note>`**

**Justification:**

This XML is well-formed because all tags are properly opened and closed.

**Errors in other options:**

- **A:** Missing closing `</note>` tag.
  - **C:** Closing tags are mismatched (`</from>` instead of `</to>`).
  - **D:** Missing closing `>` in the ending tag (`</note>`).
- 

**5. Choose the correct protocol for web communication and justify your choice.**

**Answer: B. HTTP**

**Justification:**

**HTTP (HyperText Transfer Protocol)** is the standard protocol used for communication between web browsers and web servers to transfer web pages and resources.
